The Scourge of the Nursery and Row to Treat It.

(From the New York Times.) Beside the character common to the de vinter vill not last, you know, Her-coup known as exanthemata, scarlatins man. Pring me one uf de goats und I group known as exanthemata, scarlatina man. is almost always attended by sore throat, vill al and the scarlet rash or eruntion, which gives the name to the disease, breaks out as early as the second day after the exth or seventh day in the separation of the cuticle. Nearly all medical writers mention three varieties of the diseasecarlatina simplex, in which scarcely any throat trouble attends the fever and the rash; scarletina anginosa, in which throat trouble is more prominent than in either of the other affections, and searatina maligna, in which the system is turnediately overborne by the violence of the disorder, and the patient exhibits great weakness and loss of vitality. The disease begins with chilliness, lass tude, he dache, rapid pulse, dry, hot skin, flushed face, loss of appetite and furred tongue. Presently the throat feels irritated, grows red, and is often the store, swellen. The small points of the rash extremities. The separation of the in the from the declaration of the distemper. sometimes accompanied with delirinm

so increase that the skin soon seems almost uniformly red, extending from the face, neck and breast to the trunk and scales usually in a fortaight or more The fever continues with the rash; is even coms. - In the malignant, or third form, the rash comes out late and par-tially, being at times barely perceptible. At other tames it may abruptly recede, or be mingled with livid spots. The skin is cold, with feeble pulse and extreme prestration, and death may occur quently from blood-poisoning-in a few hours. In such cases the tongue is dry, brown, tremnlons; the throat is livid, swollen, ulcerated, gangrenous; breathing is impeded by viscid muchs that collects about the fauces, and medioine avails little. Even in scarlatina anginesa there is considerable danger. may prove fatal from the inflammation or effusion within the head, or from disorganization of the throat and sloughing off of adjacent parts. Teeming women are in imminent peril from the mildest phase of the fever. When it seems to be cured its consequences are hazardous. Children, to whom it is main ly confined, of course, are subject after severe attack to permanent ill-health, and to some of the many forms of chronic scrofule, as shown by boils, sores behind the ears, inflammati the eyes, glandular swellings, and strumous ulcers. Scarlating is often followed by a peculiar dropsy, affecting the subcutaneous cellular tissues and larger scrous cavities. It occurs, like all the exanthemata, as an epidemic times in very virulent type. In the simple variety, remaining within doors, non-stimulating diet and regulation of the bowels are generally found sufficient. In the second variety, leeches are often employed, especially where delirium supervenes. The two principal sources danger in the malignant variety are from the primary effect of the contagious poison upon the body and from gangrenous ulceration of the throat. The final result is always uncertain. Whether it is contagious throughout its course, or at one period slone, has never been ascertained; but that the power of contagion remains in clothing, furniture, etc., is unquestioned and unquestion-Old People's Unconscious Jokes.

Long life and old habit create an amusing self-oblivion when comparison with others is suggested. It is somelike the mebriate's phantasy which him enange places with the world ink every man drunk but himself like the simple unconscion English servant, who, when hi. eaning to discharge him, told "We must part, John," asked, ere do ye propose goin' to, sir?" sold story of Thad Stevens saying stout young men who used to him in his chair to the House of statives : "Well, boys, who will y me when you are gone? is tha Stevens, however original it might have been with him.

An old gontleman, 70 years old, once remarked: "I take pains with my writ-ing, so that when I am old I shall be able to read it." Another, aged 77, at the head of a

large publishing-house, on being remonstrated with for working so hard, answered: "I den't feel it now, but I expect I shall in after life."

The youngest daughter, of 72 years, having died, one of her parents, who was 100 years old, remarked: "I always told thee John, we should never rear that child."

Suicide.

Suicide is a crime under the laws of nearly all civilized countries. This legislation, however, is relatively modern. It used to be considered the cor-rect thing for a man to kill himself if he ired. The impression that it is wicked did not prevail among the ancients. And, in fact, the Bible says nothing about suicide. The Old Testament and the New Testament alike are tumb, and nothing is found concerning the Oriental theologies or in the codes. The old philosophers re-

the matter to a question of opnism. Cloero thought that "the wise man ought to pass with pleaswhenever he felt like it; and Sen-"If I suffer from disease, I should not kill myself to escape from pain, for that would be an act of cowardice, but if I perceive that my disease is facurable, I should end my life, because the disease would deprive me of all which can render life worth having. It is cowardly to die to escape suffering. It is stupid to live in order to suffer."

Buch-Needed Definition.

"What is a cold?" asks Chambers' Journal. Well, sir, supposing you begin by sneezing so hard you nearly break your neck and bite your tongue terribly. Then your nose gets stuffed up and you need about fourteen hand-kerchiefs a day and the end of your nose gets more tender than a boil. And your eyes ache and are watery and you begin to cough so the folks across the way can't sleep; and you feel lame all over, as though you had been under a fire engine, and you're ugly and kick the dog and chase the cat with a boot-jack, tell your wife also can't cook and make the household a generical for ten days. Then you've got a cold.—Boston Post,

A Simple Apparatus. An ingenious Frenchman has invented a simple apparatus for the use of bathers who cannot swim. Inflated India-rubber begs support the swimmer, and ensit upright with head and shoulders above water, so that he can propel himself. The principal novelty of this contrivance lies in the propelling device, which is constructed so as to collapse when pulled forward, and to spread open when pushed back, like a duck's foot when swimming. The pro-pellers are suspended by chains or cords attached to the buoying jacket.

THE wish often falls warm upon my heart that I may learn nothing her that I cannot continue in the other world; that I may do nothing here bu doeds that will bear fruit in beaven,

Teaching Him the Business.

"Herman," said a Poydras street merchant clothier, addressing his clerk, "haf ve sold all of dese overgoats vat vas left over from last vinter?" "No, sir; dere vas dree of dem left

vill show you somedings about de pisness. I vill dell you how ve vill sell dem oud, und you must learn de pisness, Herman; de vinter vas gone, you know, appearance of the fever, and ends on the und ve hav had dose goats in de store more es seex years. An \$8 overcoat was handed him by

his clerk, and, smoothing it out, he took a buckskin money-purse from the showease, and, stuffing it full of paper, dropped it into one of the pockets. Now, Herman, my boy," he contin-

ued, "vatch me seli dat goat. I hat sold over dirty-fife uv dem shust de vay, and I vant to deach you de pisness. Ven de nexd gustomer comes in de shop, I vill show you de vay Rube Hoffenstein, mine broder in Detroit, sells his cloding and udder dings." A few minutes later a negro, in quest

of a suitable part of cheap shoes, entered The proprietor advanced smiling and inquired "Vat is it you vish?"

"Yer got any cheap shoes hyar?" inquired the negro. Blenty uf dem, my frent-blenty;

at any price you vant. negro stated that he wanted a pair of brogans, and soon his pedal ex-tremities were incessed in them and a pretty tough looking crowd. We were bargain struck. As he was about to leave the proprietor called him back.

"I sin't gwine ter buy nuffiu else; I's got all I want," said the negro, su leniy. Dot may be so, my dear sir," replied the proprietor, "but I shost vants you to look at dis goat. It was de pure Russian vool, and dis dime last year you doan got dot same goat for \$25. gracions, ciothing was gone down to noding and dere was no money in de pis ness any longer. Dink of dot. Min frent, dat goat vas Russian vool, dies and hevy. Vy, Missier Jones, who owns de pank on Canal streed, took dat goat home mit nim yesterday, and verit all day; but it was a leedle dight agross de shoulders und he brought it pack shust a vile ago. Dry it on, m dear sir. Ah I dot vos all right, Misder Jones vas a rich man and he liked do goat. How deep de pockets vas, but at was a leedle dight agross de shoulders,

The negro buttoned up the coat, thrust his hands in the pockets and leit the purse. A peaceful smile played to his mind the contents of the pockets but he choked down his joy and in

"Who did you say wore this hyar "Vy, Misder Jones vot owns de pank

"What yer gwine to ax fur it?" "Dwendy dollars," "Dat's pow'ful high price for die coat. but I'll take it."

"Herman, here, wrap up dis cost fur it vill make him look nice mit de la

"Nebber mind, I'li keep de coat on,' replied the negro, and, pulling out a elbows and coat-tails; and do you roll of money, he paid for it and left the what Grant said after the parade?" While he was around the next corner

mosning over the stuffed purse, Hoffenstein said to his clerke "Herman, fix up anudder von of dose

goats de same vay, und doan forgot to dell dem dot Misder Jones vot runs de pank on Canal street vore it yesterday' -New Orleans Times

The Formation of Coal. In the swamps and bayons of the moist

egions of the South pure vegetable mat-

ter, having the appearance and proper-ties of peat, may often be found in the very act of accumulation. It frequently occurs in immense beds, and it requires no trained observation to see that, in addition to the remains of the ordinary low marsh plants, it is made up of the ruins and refuse of swamp-loving forest trees. Now, all about the flanks and spurs of the Rocky mountains, with greater or while robbing a wood pile,"—San Fran-less intervals, from New Mexico to far visco Chronicle. beyond the northern limits of the United States, there are found beds of coal of peculiar quality. This coal is covered up with hardened mud containing shells and bones of aquatic animals, and everything about it suggests that the coal-making material was somehow sunk beneath the waters of an old lake, and was buried under the gradually-increasing bed of mud with which the old lake-basin was finally tilled. But the point of interest is this that in many places the Rocky mountain coal has reached a stage of decomposition not so very much in advance of the hu mus and peat of our modern swamps and bayous. We might, indeed, hesitatabout calling some portions of it coal a all-for the original structure is almost perfectly preserved—yet it must be admixed that for the most part the decomposition has advanced far enough to proluce an article that deservedly ranks as coal. In the light of what may be observed going on in every favorably sits a ated swamp to day, the source of the material and the method of accumulation of the Rocky mountain coal can hardle be doubtful. I need not weary you b leading you step by step through all the erent stages in the process of coal for eation. It will be sufficient to say that perfect graduation may be traced from se lignite, as it is called, of the Rocky nour aims to the purer and more perfect oad of the Musiccippi valley; and acfour Iowa coal, we are compelled to elieve that it is simply one of the terms of the same series to which the lignife and the pest belong, and that the initial

the living vegetation of modern mural and forest -- R. S. Caivin, in Popular

The New York Herald publishes an interesting outline map of the United States on which the areas of the differsize of this country and the countries of Brunswick, Scotland as Nova Scotia, New-Mississippi, or about three-eighths of the total area, is equal to the states of Europe, excluding Russia and Turkey.

'Twixt women and wine, man's lot is to smert; the wine makes his head ache, and women his heart, -Old rhyme. The Story of a Veteran.

In a fashionable saloon on Kearny street, two distinguished-looking militis men were recounting their numerous campaigns at Sacramento and San Brucoat empty lounged up to the bar. As he did so he touched the elbow of one "Vell, ve must sell 'em right avay, as of the bullion-bound warriors, and at once apologized to the fierce military "Beg pardon," said he, "but I'm al-ways kind of careless when any of the

boys in blue are round. I used to be one myself." The warriors in blue and gold did not deign to respond, but the stranger was not on the alert for any obvious slights, 'I lost this arm," he continued,

Vicksburg. And this cough," he added, as he sho k on a spasm, "I got in e same place.' "Rather a poor recompense, wasn't Couldn't you get anything better?" "Yes," said the wrick of humanity, with a touch of genuine pride, "I got this, too," and he threw back the lapel

of his rusty coat to exhibit a small

As he unclasped it and handed it over for inspection, he said: "I got it for being the best-dressed soldier in the Thirt enth Army C rps at Milliken's Bend, b fore the capture of Vicksburg. We had been slashing aro ind Vielsburg a whole month, and, for a change, had one up the White river and taken Arkansas Post, with 5,000 rebs. When we stationed in swampy timber ground that every shower used to make a slough of, and the fellows were mud all over. iay before Grant took command at Misiken's Bend we had orders to fix up for he occasion, and it was given out that e best-dressed man in each regiment would get a medal. We all went to work scrubbing and polishing, but it was no use. A fellow couldn't rub the and out of his clothes, and, it he washed t out, the minute they got half dry they ooked as bad as ever. Most of the ferows gave it up for a bad job, but I'd made up my mind I was going to get the medal. I had a pretry good uni-form, and after t'd sewed it up on the e bows and tack-d the skirt of the coat up it looked good enough, only for the and. It was about as good as any

' Bought a new one, I suppose," said the barkeeper. The veteran smiled. "I went down and stood up to my chin in the Yszoo for an hour before parade. I'd burnished up all the buttons and blackened my shoes with a piece of burned leather id pork fat, and when I walked up with my wet suit I just paralyzed the crowd. I looked as it I d come out of a bandbox then I stuck ou my shoes and cap and hrew my musket over my shoulder "And you got the medal?" said one

other uniform in the corps, but, of

course, that wouldn't amount to nothing;

I winted it to be better. What do you

think I did?"

of the militiamen, handing back the Yes, I got it, and more, too. I got January, you know, and it set in to ow from the west, and before the pade was over I was most froze to death tinish me, the Colonel was so tickled with my appearance that I was detailed for orderly duty at headquarters, and had to march around for four hours, until the icicles were hanging out of my elbows and coat-tails: and do you know

"What?" "He remarked, with considerable celing, 'it's a long time between The barkceper shoved three glasses

ver the mahogany, and the militiamen oth put their hands in their pockets to "Yes, gentlemen," said the veteran,

s he wiped his grazzly mustache on his ost sleeve and edged toward the door. 'I got the medal, and don't you forget "I shouldn't wonder." said the baresper, as the veteras flitted through the corway, "if that fellow isn't an eight-

en-carat fraud and lost his arm in a acw-mail. "You do him an injustice, I assure ou," said a thoughtful but dilapidated person, bending over the lunch-counter. I recognize him as an individual who

and a fimb shot off in Virginia City

Hesiern Life. With only a team and a few dollars the emigenut determines to make him self a home in the wilds of the West, His first care is to build a sod-ho he must have a shelter. That done, bout the middle of May he commences reaking prairie, and, if he has a good corse-team, succeeds in getting from orty to sixty acres broken by the midle of June. A few acres of the first reaking are usually planted with corn, opped into a cut made through the ed with an ax, which incision is closed on by the foot of the planter. This annot be cultivated, and is wholly at is a failure, but of a favorable season yields twenty or thirty bushels to the Melous, pumpkins and squashes qually do well on sod, and turnips sown a mid-unmer seldom fail. In the fal-e back sets his ground with his ceaking plow, taking an inch or so of ground from below the spring breaking. se ground should not be plowed deeper can it is thoroughly rotted. The grou

s how ready for the crop, and his wheat sown the last of February, or in March. He has pienty of work to do, and hard work at that. No chance to take money e capes him. The first car or two is almost invariably one of ardships and privations for the average The weak or shittles nes usually give way in despair and ira eastward. The resolute one, stay, d soon have com ortable homes. But young man should go West unless he prepared to work hard in the face of

many difficulties.

A Strange Accumulation. Thomas Dick puts the noarding of wealth in this striking way : Suppose a man could lay up a stock of ciothes and provisions sufficient to last mm for 300 years, what would it avail mm, since he can live at most but from ent European states are laid out, sug-gesting at once to the eye the relative up in a store-house 70,000 pairs of shees, to what end would it serve, if he could the Old World lying west of Russia and make use, during his whole life, of only furkey. England is as large as New the one-hundredth part of them? He would be in the same condition as a man foundland as Ireland. France stretches who had 100 dishes placed before from the northern boundary of Maine to | imm at dinner, but who could partake of the western boundary of Ohio, and to the southern boundary of Pennsylvania, Germany could be got into the space but could occupy only one. How rediculying between the senthern boundary of lons it would appear if all that could be Penpsylvania and New Jersey, the At- said of a man while yet he lived was lantic, the Ohio river, the Mississippi simply this-that his whole life had been river, and the northern boundary of Georgia and South Carolina. Spain is equal in area to South Carolina, Georgia which were never intended to be used gia, Alabana and Louisiana. Italy resembles Florida, both in size and shape. 000 pairs of trousers which were never Austria would embrace Lake Michigan to be worn! And where is the difference, and the four States between the lakes in point of rationality and utility, beand the Mississippi river — Michigae, wisconsin, Illinois and Indiana. So that he area of the United States east of the which are never brought forth for the senent of manhind. There is no conduct connected with the pursuits of human sings that appears more absurd than each practices (however common) if ex-

Cats are curious cattle. They are sel-

but since the fashion of seal sacques ecret among the owners of seal garments. They set the seal of secrecy up-

a it. Purr-haps they are wise. time the u the lives nine times longer than she This suggests a problem, which lovers

of mathematics—there are those, alas! who love them-can puzzle over. If it take nine tailors to make one live man and nine lives to make one cut what does a catamount to? (Correspondents sending answers will pleas inclose a 3-cent stamp, not for publica-tion, but for the use of the compiler of this authentic history.)

The cat is not subject to tax. Efforts have been made to insert a clause in the Dog law to include cats, but thus far the cats have inserted their own claws Not only do they escape tax, but the taxidermist also. They do their own

At the time of the flood Father Noah endeavored to keep the cut out of the ark, but the cat got her back up an passed in under the guise of a camel. Until very recently, every ship ha since that time carried a cat. Many stories are told of the seafarin-

cat, including nine tails, which are oft a In Egypt cats were regarded as sacred wimals. To kill one was an offense pun

ishable with death.

The cut remembers this, and to this day takes a fence on the slightest provo-Formerly, when a cat died, all the in-

mates of the house went into mourning. Now the household goout into the ni and erect bootjacks to its memory. T don't wait till morning. The Egyptians wer-hiped a cat-hea

deity, and mariners, who come t experstitions, still set up cat-heads The Ebyptian cat lived in a dark age the modern cat closes her existence in a

Cut-skins were a favorite dress-trimning in the middle ages, whence arose the prover that a skinned cat is better

The cat's kin are now exclusively used as a trimming for back fences. A catkin is a young cat, and is great on the spring. In the spring she may be seen among the topmost branches of

Cats were introduced into England from the Island of Cyprus. They are not found in the eypress now; only on In ancient Wales a cat fetched the

same price as a calf. Her modern waits now frequently fetch a whole cowhide in the shape of boot leather. Cats are Baptists by profession, but those who indulge their predilections during early kittenhood seldom survive. Cats are very mewsical. They are all pase singers. The nocturne is their fa-

vorite composition. Nox is their especial deity. Knocks dways accompany their concerts, Cats do not open their eyes until 9 days old. Do they ever close them again? Nein. Throw a boot-jack at a sleeping cat and you will be convinced

Cats are supposed to be accomplices of witches, which is probably because they love the darkness rather than light, It is said that cats are cleverer than dogs and more easily trained. They are great pedestrians, and can make more laps in a given time than any other

They are generally healthy, notwithstanding we hear of "the cat ill upon a thousand nills." A great many more things might be said about the cat.

But silent be, it is the cat !- Boston Transcript.

Interviewing.

Interviewing has reached its lowest depth when we find newsparer reporters ing attendance on a cat's-meat man. Yet this is what has happened in America, and we are compelled to confess that the reporter found the purveyor of skewered victuals far more interesting than most of the notabilities who are interviewed on the public behalf. The particular "cat-man" was indeed some-what of a hero-one of the self-made men of whom cities are so proud when they die. It appears that when he began catering for pussy he went his rounds himself, but he has now grown so prosperous that four assistants carry his baskets for him. His cat customers do not heed the change, for they remark only the quality of the meat purveyed and not the quality of the purveyor, Left to themselves, the animals, though having the run of large warehouses would starve, for American rats and mice will not remain in dry-goods stores, which are lean livings, so have choice of fatter menmbencies; but mice or no mice, the cat is an institution, and so the "cat man" drives a thriving trade. A wicked rival tried to ruin our hero by hawking fish instead of meat, and pretending to pussy's owners that, as fish contained much pho-phorus, and phosphorus m de brains, no one could expect to have a really smart cat that was not fed upon fish. But the "catman" promptly checkmated his rival by distributing a namibili to the effect that fish made cats mangy, whereas meat gave them sleek and glossy coats. As proved in the sequel, the New Yorker prefer fat cats to smart ones, and the fish fellow h d no chance ag unst his antagonist,-London Telegraph.

Sheep that Dive from Cliffs.

John Muir, the naturalist of the Sierra, writing of the wild sheep of the Sierra and of their well-authenticated habit of diving from precipices and aughting on their h uns, relates the following an-

"At the base of Sheep rock, one of the winter strongholds of the Shasta flocks, there lives a stockraiser who has the advantage of observing the movements of wiid sheep every winter, and, in the course of conversation with him on the subject of their diving habits, he pinted to the front of a lava headla about 150 feet high, which is only 8 or 10 degrees out of the perpendicular. There, said he, 'I followed a band of them fellows to the back of that rock yonder, and expected to capture them all, for I thought I had a dead thing on them. I got behind them on a narrow bench that runs along the face of the wall near the top, and comes to an ead where they couldn't get away without falling and being killed; but they jumped off, and landed all right, as if that were the regular thing with them. "What! said I, 'jumped 150 feet!

Did you see them do it?'
"'No,' he replied, 'I didn't see them
going down, for I was behind them; on saw them go off over the brink, and then I went below and found then tracks where they snuck on the loos debris at the bottom. They sailed right off, and lauded on their feet right size up. beat- anything else that goes on four

CHRONICLE THE

SAN FRANCISCO

OF THE

Leading Newspaper

THE CHRONICLE BUILDING. THE SAN PRANCISCO CHEONI-CLE is the first paper on the coast in ability. and in the freshness and reliability of its NEWS. Nothing that the world desires to know is omitted from its columns. It aims to fill every requirement of a first-class paper. Its Telegraphic Reports are the latest and most

reliable; its Local News the fullest and spiciest,

and its Editorials from the ablest pear in the

THE CREONICLE has always been, and always will be, the friend and champion of the people as against combinations, cliques, corporations or oppression of any kind. It will be independent in everything, neutral in nothing; falt and impartial to all parties, yet exposing corruption wherever found, and working with fearless endeavor to promote and protect every interest of the great public whom it serves and on whom it depends for its support.

THE DAILY SAN FRANCISCO CHRONICLE, including the SUNDAY EDITION, sent to any part of the United States, postage paid, for \$6 70 a year.

50 cents POSTAGE STAMPS
